

## AMENDMENTS TO THE CLAIMS

**1-9. (Cancelled)**

**10. (New)** A container for transporting and distributing seed-like, powder-like or liquid goods, comprising:

a hermetic pouch, having

a sealed bottom surface,

a sealed first side surface,

a folded second side surface,

a top surface sealed by a transverse seal extending horizontally along said top surface,

two vertical seals extending from said top surface, said two vertical seals being separated by a vertical cut, and

a flexible pour pipe defined by said vertical cut and said folded second side surface; and

a rectangular prismatic carton having a pour spout, said pour spout being movable between a closed position and an open position, wherein said hermetic pouch is adhered to inner surfaces of said rectangular prismatic carton, said flexible pour pipe is adhered to said pour spout, and wherein said hermetic pouch and said rectangular prismatic carton have a structure and are arranged such that said flexible pour pipe moves with said pour spout between the open position and the closed position when said pour spout is moved between the open position and the closed position.

**11. (New)** A container according to claim 10, wherein said flexible pour pipe has a sufficient length such that, after movement of said pour spout and said flexible pour pipe to the open position, said flexible pour pipe is trapped by said pour spout when said pour spout is moved to

the closed position.

**12. (New)** A container according to claim 10, wherein said hermetic pouch has a rectangular prismatic shape.

**13. (New)** A container according to claim 10, wherein said hermetic pouch is formed of a sheet of paper, plastic or plastic-metallic material.

**14. (New)** A container according to claim 10, wherein said hermetic pouch is adhered to inner surfaces of said rectangular prismatic carton by gluing, and said flexible pour pipe is adhered to said pour spout by gluing.
